

VSAT TRAILERS

BATTERY BULL TRAILER

Our range of Very Small Aperture Antenna Terminals, or VSATs, are designed for customers who need significant communications equipment storage and extended height solutions of up to 30m. Each product has been expertly engineered with ease and usability in mind. They feature everything from vibration-dampened equipment enclosures to optional recirculated, closed environment air conditioning and water-cooled diesel generators to allow the trailer to be securely locked for autonomous operation.

Our **Battery Bull VSAT** is built on a tandem ADR-compliant axle trailer.

FEATURES

SIZE

Overall Length 5.8m

Overall Height 2.26m (transport mode)

Overall Width 2.16m

STRUCTURAL

Platform payload: TBC

Electric drum with park brake

ADR-compliant LED lights with seven-pin small round plug

Hot-dipped galvanising

ENCLOSURES

24 x 24 RU, air conditioned, vibration dampened, IP65
