

VSAT TRAILERS

CALF VSAT TRAILER

Our range of Very Small Aperture Antenna Terminals, or VSATs, are designed for customers who need significant communications equipment storage and extended height solutions of up to 30m. Each product has been expertly engineered with ease and usability in mind. They feature everything from vibration-dampened equipment enclosures to optional recirculated, closed environment air conditioning and water-cooled diesel generators to allow the trailer to be securely locked for autonomous operation.

Our **Calf VSAT** is built on a single ADR-compliant axle trailer with RF support.

FEATURES

SIZE

Overall Length 3.9m

Overall Height 1.7m

Overall Width - 2.2m

STRUCTURAL

Platform payload: TBC

Manual override disc with park brake

ADR-compliant LED lights
